PROFILE

B.Sc. Computer Science graduate focused on building practical AI and automation systems. Experienced in developing LLM agents, n8n workflows, and Python integrations to solve real business bottlenecks. Highly proficient in leveraging advanced AI development tools (Cursor, Claude Code, Antigravity, Gemini) to build and iterate rapidly. Brings a strong system-wide approach: successfully connecting software, infrastructure, and business processes through deep, precise characterization and planning before any actual development.

EXPERIENCE

AI & Automation Developer | High Networks Ltd | 2025 – Present

- Responsible for designing, developing, and implementing AI and automation solutions that streamline business processes and IT infrastructure.
- Build end-to-end systems, AI agents, and integrations using Node.js, TypeScript, REST APIs, and databases.
- Work directly with clients to implement automation workflows and integrate external systems, including Priority ERP, significantly reducing manual effort.

NOC Engineer | Tevel Metro | 2026 – Present

- Responsible for monitoring servers, applications, and critical network infrastructure using tools like SolarWinds and monday.com, managing alerts and incident escalation.
- Built a comprehensive NOC portal used daily by the entire team to manage shift tasks, handovers, troubleshooting workflows, and employee onboarding.
- Deliver AI training sessions and create practical guides, helping employees adopt AI tools to streamline workflows and improve organizational efficiency.

IT Support Technician | Priority Software | 2024 – 2025

- Provided comprehensive technical support across hardware, software, and network infrastructure.
- Managed Priority ERP systems and troubleshoot connectivity and configuration issues to ensure smooth daily operations.

SKILLS

Languages & Backend	Python, TypeScript / Node.js, SQL
AI & Automation	Generative AI & LLM APIs, AI Agents, n8n Workflow Automation, Business Automation
Data & Infrastructure	PostgreSQL, MongoDB, Firebase, Docker, REST APIs & Webhooks
Tools & Platforms	Git, Cursor, Claude Code, Antigravity, Gemini

PROJECTS

Hermes | Hierarchical AI Agent System

- A Python-based ecosystem of LLM-powered agents orchestrated via Telegram.
- Features webhooks, REST API integrations, and smart task delegation across specialized sub-agents.
- Implemented secure connections to sensitive platforms, such as bank accounts, for fully automated financial tracking.

Server Audit Automation | Diagnostics Dashboard

- Replaces a manual, hour-long process where technical support connects to a server to run over 50 checks.
- The system executes these checks securely with a single click, presenting a fully organized report on a web dashboard.
- Drastically reduces manual effort, saves time, eliminates human errors, and streamlines technical operations.

PuppyCare | Smart Kennel IoT Monitoring System

- Live real-time sensor data pipeline running Python on a Raspberry Pi.
- Streams live sensor data to Firebase and triggers FCM push alerts.
- Synced in real-time to a companion SwiftUI iOS app for live dashboards and continuous monitoring.

NOC Operations Portal

- A comprehensive portal built for the Tevel Metro NOC team.
- Serves as the central hub for managing shift tasks, daily summaries, handovers, and troubleshooting workflows.
- Streamlines daily operations and new-employee onboarding and training.

EDUCATION

B.Sc. in Computer Science | Ono Academic College | Graduated 2026
